

# Apolium Distribution & Incentive Platform

*Ab tak jo design hua hai — aasan bhasha me, taaki aap har rule check kar sakein.*

Is document me poora system hai — franchise network, products, billing, member network aur incentive plan. **Please padhiye aur bataiye kahan koi rule aapke business se match nahi karta.** Abhi rule theek karna aasan hai; banne ke baad mehnga padta hai.

## 01 Ye Document Kaise Padhein

Ye technical document nahi hai. Isme koi software knowledge ki zaroorat nahi. Ye isliye banaya hai taaki **aap har business rule padh kar confirm kar sakein** ki humne sahi samjha ya nahi.

| BOX KA RANG             | MATLAB                                        | AAPKO KYA KARNA HAI                         |
|-------------------------|-----------------------------------------------|---------------------------------------------|
| <b>Rule</b>             | Ye rule humne samjha aur design me daal diya. | Padhiye. Confirm kijiye.                    |
| <b>Confirmed</b>        | Ye aap pehle hi approve kar chuke hain.       | Kuch nahi karna.                            |
| <b>Assumption</b>       | Ye humne maan liya kyunki clear nahi tha.     | <b>Zaroori</b> — confirm ya correct kijiye. |
| <b>Decision chahiye</b> | Ye sirf aap decide kar sakte hain.            | Decide karke bataiye.                       |

### YE KYUN ZAROORI HAI

Galat rule **abhi** pakda jaaye → ek baat-cheet me theek ho jaata hai.

Wahi rule **development ke baad** pakda jaaye → hafton ka rework, dobara testing, aur members ki earning dobara calculate karni pad sakti hai.

**Section 5 ke numbers dhyan se dekhiye** — wahan sabse zyada dhyan chahiye.

## 02 System Ek Nazar Me

Aapke business me **do alag structure** saath-saath chalte hain. Inko alag samajhna sabse zaroori hai:

|                | FRANCHISE NETWORK                                                         | MEMBER NETWORK                                                            |
|----------------|---------------------------------------------------------------------------|---------------------------------------------------------------------------|
| <b>Kya hai</b> | Aapki physical supply chain — warehouse, mini-warehouse, franchise shops. | Aapki selling community — members (BPA) jo kharidte aur refer karte hain. |
| <b>Shape</b>   | Level ki hierarchy (WH → MWH → L1 → L2 → L3).                             | <b>Binary tree</b> — har member ke Left aur Right, do leg.                |
| <b>Kaam</b>    | Stock bhejna, paisa manage karna, credit aur stock limit.                 | Kisne kisko laaya, aur incentive calculate karna.                         |
| <b>Kamai</b>   | Product margin (price ladder) + commission.                               | Points (PV) se incentive.                                                 |

### SABSE IMPORTANT BAAT

Ek **product sale** se do alag cheezein hoti hain, saath me:

**(1)** Stock aur paisa **franchise network** me chalta hai — ye trading business hai.

**(2)** **Points** banke **member network** me upar jaate hain — ye incentive business hai.

Ye dono kabhi mix nahi hote. Ye samajh gaye to baaki document aasan hai.

## Paanch module

| # | MODULE                   | KYA CONTROL KARTA HAI                                                                             |
|---|--------------------------|---------------------------------------------------------------------------------------------------|
| 1 | Franchise & Distribution | WH → MWH → L1 → L2 → L3 network, pincode area, buying limit.                                      |
| 2 | Products & Pricing       | Product catalogue, har level ka alag price, GST, aur har product ke points (PV/GV).               |
| 3 | Billing, Wallet & Stock  | Fund request, stock request, billing, aur commission.                                             |
| 4 | Member Network           | Binary tree — sponsor, placement, aur naya member kahan lagega.                                   |
| 5 | Points & Incentives      | Poora earning plan — Self/Direct/Team point, BPI matching, capping, Startup, Mentor's, Achievers. |

## Scale — kitne log sambhalega

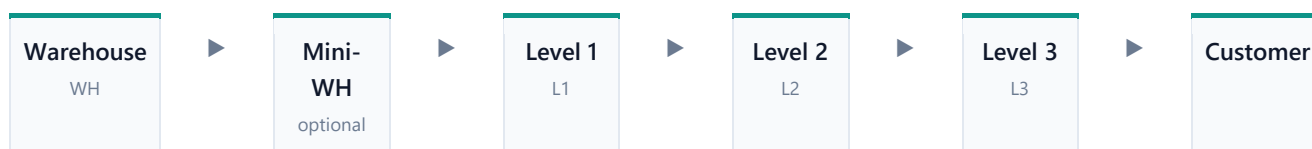

|           |     |      |
|-----------|-----|------|
| 5,00,000+ | Roz | 100% |
|-----------|-----|------|

| MEMBERS | AUTO CALCULATION | HISTORY / AUDIT |
|---------|------------------|-----------------|
|---------|------------------|-----------------|

Aapne kaha tha system ko bahut saare logon pe kaam karna chahiye. Hum **1 lakh se 5 lakh members aur usse aage** ke liye design kar rahe hain — chhote pilot ke liye nahi. Matlab: kuch bhi haath se calculate nahi hoga, sab roz apne aap chalega, aur **har rupee aur har point ka hisaab** us exact sale tak trace ho sakega jisse wo bana.

## 03 Module 1–3 · Franchise, Product, Billing

### 3.1 Network aur service area

#### RULE — NETWORK

Upar **ek Warehouse (WH)** — saara stock wahin se.

**Mini-Warehouse optional** — kahin hoga, kahin nahi. Ek se zyada bhi ho sakte.

Neeche franchise **Level 1, 2, 3** (abhi max 3 level; aage badha sakenge).

**Levels sparse ho sakti hain** — zaroori nahi har chain me teeno level ho.

Har franchise kuch **pincode** serve karti hai, aur **neeche wale ke pincode apne aap upar wale ko bhi mil jaate hain**. Member ka pincode decide karta hai wo kis shop se kharid sakta hai.

| KAHAN SE KHARIDE                                    | LIMIT                                                                                             |
|-----------------------------------------------------|---------------------------------------------------------------------------------------------------|
| Apni home shop se (jo uska pincode serve karti hai) | Unlimited                                                                                         |
| Kisi doosri shop se                                 | ₹2,000 per month (paise pe, quantity pe nahi)                                                     |
| Admin special limit de de                           | Wo amount us mahine ka <b>total</b> cap (₹10,000 = ₹2,000 normal + ₹8,000 extra). Sirf ek mahine. |

Member khud limit nahi badha sakta — **request** bhejta hai, **Admin** approve/reject karta hai. Har mahine limit wapas ₹2,000 ho jaati hai.

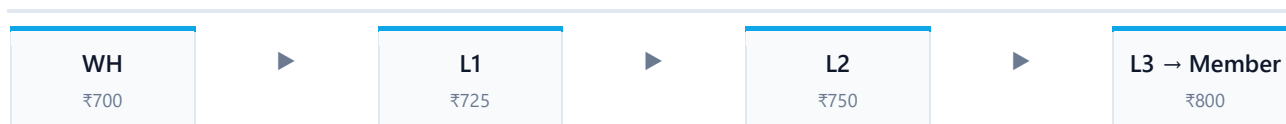

### 3.2 Product — catalogue aur points

Categories **nested** hain (4 level tak), aur product **kisi bhi level** pe lag sakta hai — zaroori nahi sabse neeche ho. Har category ka ek prefix hota hai jisse **product code apne aap** ban jaata hai.

| FIELD             | EXAMPLE                           | NOTE                          |
|-------------------|-----------------------------------|-------------------------------|
| Product name      | Rakshak                           |                               |
| Auto product code | Ag-Rakshak123                     | Category prefix + naam + id   |
| QR code / Barcode | —                                 | Billing pe scan karne ke liye |
| Packaging + Unit  | Box / Bottle / Bag · ml / kg / pc |                               |

|                       |          |                                        |
|-----------------------|----------|----------------------------------------|
| MRP                   | ₹1,000   | Printed price                          |
| Sell price (MSP)      | ₹800     | Member isi me leta hai                 |
| Crops (fasal)         | multiple | Ek product kai crops ke liye           |
| Images                | multiple |                                        |
| Points — PV / GV / CV | 30 PV    | Poora incentive plan isi pe chalta hai |

### 3.3 Price ladder — har level ka alag price

| KISKO BECHA     | PRICE      | US LEVEL KA MARGIN                  |
|-----------------|------------|-------------------------------------|
| Level 1 (WH se) | ₹700       | —                                   |
| Level 2 (L1 se) | ₹725       | L1 ko ₹25                           |
| Level 3 (L2 se) | ₹750       | L2 ko ₹25                           |
| Member (L3 se)  | ₹800 (MSP) | L3 ko ₹50                           |
| Total margin    | ₹100       | 800 – 700, hamesha poora bat-ta hai |

Mini-Warehouse chain me **ho** to WH usko **₹685** me deta hai aur wo L1 ko ₹700 me — matlab Mini-WH ka margin **₹15**. Neeche ki chain waisi hi chalti hai.

#### RULE — MISSING LEVEL KA MARGIN

Agar koi level chain me nahi hai, to **uska margin upar wale existing level ko mil jaata hai**.

Example: chain me L1 aur L3 hain, L2 nahi. Member ₹800 me leta hai. L3 ko apna ₹50, aur L2 ka ₹25 L1 ke ₹25 me jud jaata → **L1 ko ₹50**. Total margin hamesha ₹100 hi rehta hai.

#### ASSUMPTION — PRICE CONFIRM KIIYE

Upar ke numbers aapke **module spec** se liye hain (L1 ₹700 · L2 ₹725 · L3 ₹750 · member ₹800, Mini-WH ₹685 pe kharidta hai).

Aapke **haath se likhe note** me kuch alag numbers the (670 / 700 / 750 / 800). Dono me farq hai — **please confirm kar dijiye kaunse sahi hain**, kyunki isi se poora commission calculate hoga.

GST har product pe % me set hoti hai, **CGST + SGST** me split. WH→L1 sirf **stock transfer note** hai; uske baad har sale pe **bechne wali shop ke naam aur GST ka tax invoice** banta hai.

### 3.4 Billing, wallet aur stock — sabse important separation

| STEP                           | WALLET               | STOCK     | KYA HUA                         |
|--------------------------------|----------------------|-----------|---------------------------------|
| Shuru                          | ₹0                   | ₹0        | Nayi franchise. Koi limit nahi. |
| Fund request ₹3,00,000 approve | ₹3,00,000            | ₹0        | Paisa jama hua.                 |
| Stock request ₹3,00,000        | ₹0                   | ₹3,00,000 | Paisa maal me convert.          |
| Customer ko ₹10,000 billing    | ₹0 — koi change nahi | ₹2,90,000 | Sirf stock kam hua.             |

#### RULE — WALLET BILLING SE NAHI CHALTA

**Billing se wallet balance nahi badalta.** Wallet sirf **fund request** aur **stock request** se chalta hai. Billing sirf **stock** kam karti hai.

**Bina paise ke maal nahi** — pehle fund request approve honi chahiye, aur wo sirf **L1, L1-Special ya Mini-Warehouse** hi approve kar sakte hain.

| KISKE LIYE          | LIMIT TYPE  | KAISE KAAM KARTI                                                                              |
|---------------------|-------------|-----------------------------------------------------------------------------------------------|
| MWH, L1, L1-Special | Minus limit | Set limit tak minus me ja sakte. Usse aage pehle paisa dena padega.                           |
| Level 2 aur neeche  | Stock limit | Minimum stock (jaise ₹3L franchise pe ₹1L). Us se neeche gaya to <b>billing ruk jaayegi</b> . |

| KAUN KISKO BECHTA            | MARGIN SPLIT                                |
|------------------------------|---------------------------------------------|
| Mini-WH → L1 / L2 / customer | 50 / 50 — aadha seller ko, aadha company ko |
| L1 → customer                | 50 / 50                                     |
| L1 → L2 (chain me neeche)    | 50/50 nahi — price ladder se                |

#### RULE — COMMISSION

**L2 ka commission stock approve hote hi ban jaata hai** — billing pe nahi.

**Paisa hamesha Warehouse (company) ke saath settle hota** — franchise aapas me paisa nahi dete.

Aasan test: **customer** ko becho = 50/50. **Chain me neeche** becho = price ladder.

Har franchise ko **chaar balance** dikhte hain:

| BALANCE | KYA HAI | USE KAR SAKTE? |
|---------|---------|----------------|
|---------|---------|----------------|

|                             |                                                       |                                                 |
|-----------------------------|-------------------------------------------------------|-------------------------------------------------|
| <b>Inventory limit</b>      | Bina paisa diye kitna maal utha sakte (credit limit). | Admin set karta                                 |
| <b>Main wallet</b>          | Customer sale pe minus, fund jama karne pe plus.      | Haan                                            |
| <b>Commission wallet</b>    | Margin ka apna hissa (50%).                           | <b>Haan — button se Main wallet me transfer</b> |
| <b>Retail profit wallet</b> | Standard price se <b>upar</b> becha to extra profit.  | <b>Sirf dikhta — use nahi kar sakte</b>         |

**L1-SPECIAL — ALAG CATEGORY**

**L1-Special ki koi limit nahi** hoti — ye **L2 ki tarah** chalta hai, bas iski condition special hai.

Iska kaam **tabhi** hota hai jab ye **fund request lagaye**. Aur ye doosron ki fund request **approve bhi kar sakta** hai (L1 aur Mini-WH ki tarah).

## 04 Module 4 · Member Network (Binary Tree)

Har member ke **do leg** — **Left (Team 1)** aur **Right (Team 2)**. Tree infinite neeche ja sakta hai.

### 4.1 Do alag ID — sabse zyada confusion yahin hoti hai

|                       | <b>SPONSOR ID</b>                | <b>PLACEMENT (UNION) ID</b>    |
|-----------------------|----------------------------------|--------------------------------|
| <b>Batati hai</b>     | <b>Kisne laaya?</b>              | <b>Tree me kahan baithega?</b> |
| <b>Use hoti</b>       | Direct point, Mentor's Incentive | Team point, BPI matching       |
| <b>Alag ho sakti?</b> | <b>Haan — aksar hoti hai</b>     | Haan                           |

**RULE — SPONSOR VS PLACEMENT**

Ye dono **alag** cheezein hain. Jisne aapko laaya, zaroori nahi wahi aapke theek upar ho.

Ek sponsor **Left aur Right dono** me bana sakta hai.

Har member ki **apni unique ID** hoti hai, aur uske neeche wale usi ID ko parent maante — matlab **har member apni branch ke liye khud 'mother' jaisa** kaam karta hai.

### 4.2 Naya member kahan lagega — chain rule

| <b>CHOICE</b> | <b>POSITION KAISE MILTI HAI</b>                                                                            |
|---------------|------------------------------------------------------------------------------------------------------------|
| <b>Left</b>   | Sponsor se <b>left → left → left ...</b> chalte jao, jahan kisi ka left khaali mile — wahan lag jaata hai. |

**Right**Wahi tarah **right** → **right** → **right** ...**EXAMPLE — ISE VERIFY KIJYE**

Tree:  $U_1 \rightarrow U_2$  (left) aur  $U_3$  (right);  $U_2 \rightarrow U_4$  (left) aur  $U_5$  (right);  $U_4 \rightarrow U_6$  (left) aur  $U_7$  (right).

**U1 se Left** → chain  $U_1 \rightarrow U_2 \rightarrow U_4 \rightarrow U_6$  follow hoti hai, aakhir me lagta hai.

**U1 se Right** → chain  $U_1 \rightarrow U_3 \rightarrow U_7$ . **U6 pe nahi jaata**, chahe  $U_6$  bhi  $U_3$  ke side me ho.

**U2 se Right** →  $U_2 \rightarrow U_5 \rightarrow U_{11}$ .

Beech me aane wali doosri side ki branches kabhi use nahi hoti — chain kabhi cross nahi karti.

## 05 Module 5 · Points & Incentive Plan

Ye business ka dil hai. **Is section ke har number ko dhyan se check kijiye.**

### RULE — ID KE BINA BILL NAHI

Koi bhi bill banane se pehle **member ki unique ID daalni zaroori hai**. ID ke bina bill banega hi nahi.

Isi se system ko pata chalta hai points kiske hain. Bill ke har product ka PV (aur GV/CV) us member ko apne aap mil jaata hai.

Example: product ka 30 PV. Member 10 unit leta hai → 300 PV. Usi bill pe doosra product 100 PV ka → total **400 PV**.

### 5.1 Teen tarah ke point

| POINT               | KISKO MILTA                                                    | PAISA BANTA?                                                  |
|---------------------|----------------------------------------------------------------|---------------------------------------------------------------|
| <b>Self point</b>   | Sirf buyer ko.                                                 | <b>Nahi</b> . Sirf uska daily capping level decide karta hai. |
| <b>Direct point</b> | Buyer ke <b>sponsor</b> ko (ek hop).                           | Haan — Startup Incentive me.                                  |
| <b>Team point</b>   | Tree me <b>upar ke har member</b> ko, Left ya Right bucket me. | Haan — BPI matching me.                                       |

### CONFIRMED RULES

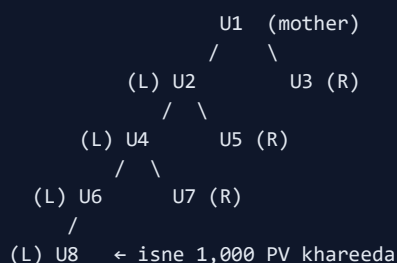

**Buyer ko sirf Self point** milta hai — team point nahi.

**Sponsor ko Direct point AUR Team point dono** milte hain (agar wo upar bhi hai to).

Team point **Left ya Right bucket** me jaata hai — har upar wale ke liye ye depend karta hai ki buyer ki branch uski kaunsi side se neeche hai.

**Ek example se samajhiye.** Neeche wala tree dekhiye. Member **U8** ne **1,000 PV** ka product khareeda. U8 ko **U1** ne **sponsor** kiya tha, par U8 tree me **U6** ke **left** me baitha hai.

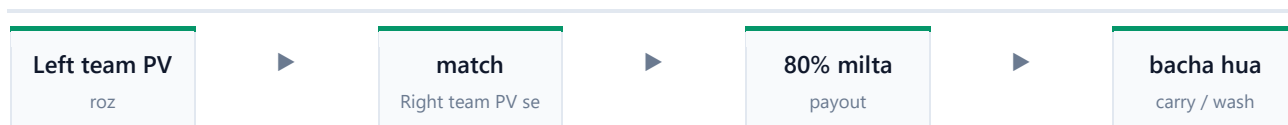

#### TREE

| KISKO MILA                 | KYA MILA             | KYUN                                                       |
|----------------------------|----------------------|------------------------------------------------------------|
| <b>U8 (jisne khareeda)</b> | <b>Self +1,000</b>   | Apni kharidari. Isse iska capping level banta hai.         |
| <b>U1 (sponsor)</b>        | <b>Direct +1,000</b> | U1 ne U8 ko laaya tha.                                     |
| <b>U6</b>                  | Left team +1,000     | U8 iske left me hai                                        |
| <b>U4</b>                  | Left team +1,000     | U6 iske left me hai                                        |
| <b>U2</b>                  | Left team +1,000     | U4 iske left me hai                                        |
| <b>U1</b>                  | Left team +1,000     | U2 iske left me hai — <b>U1 ko Direct + Team dono mile</b> |

Dhyan dijiye — **U8 ko team point nahi mila** (sirf self), aur **U1 ko dono mile** (direct kyunki usne sponsor kiya, team kyunki wo upar bhi hai). Agar U8 ki jagah koi **right** side ka member khareedta, to yahi 1,000 sab ke **Right team** me jaata.

## 5.2 BPI — roz ki main kamai

### RULE — MATCHING

Roz Left team PV aur Right team PV compare hote hain.

**Dono me se chhota** = matched, **1,000 ke multiple** me neeche round.

Member ko **matched PV ka 80%** milta hai.

Matching aapke **capping level** tak hi hogi (5.3 dekhiye).

**Example.** Left 4,000 aur Right 6,000 → matched 4,000 → payout **3,200**.

### RULE — KAUNSI SIDE BACHTI, KAUNSI UDTI

Dono side ka **purana carry** compare kijiye:

- Jiska **old carry bada** → **kuch nahi jaata**. Uska purana carry aur aaj ka business dono aage.
- Jiska **old carry chhota** → us side ka **sab wash out** (purana carry bhi, aaj ka business bhi).
- Agar us din **payout bana hi nahi** → **kuch wash nahi hota**, dono side pura aage.

**Example — ye aapke apne numbers hain. Please confirm kijiye.**

| DAY 1 | DAY 2 |
|-------|-------|
|-------|-------|

|                      |          |              |
|----------------------|----------|--------------|
| Old carry — Left     | 1,59,400 | 1,57,400     |
| Old carry — Right    | 2,047    | 47           |
| Aaj ka naya business | —        | Right: 2,394 |
| Matched (cap 2,000)  | 2,000    | 2,000        |
| Payout (80%)         | 1,600    | 1,600        |
| Wash out             | 0        | Right side   |
| Carry — Left         | 1,57,400 | 1,55,400     |
| Carry — Right        | 47       | 0            |

**ASSUMPTION — CONFIRM KIIJIYE**

Day 1 me Right ka old carry chhota tha, phir bhi uska 47 **bach gaya**. Day 2 me Right ka **wash ho gaya**.

Humne ye samjha ki wash **tabhi** lagta hai jab us side pe **aaj naya business aaya ho**. Day 1 me Right pe kuch nahi aaya tha, isliye bacha.

**Isse aapke dono din bilkul sahi aate hain — par confirm kar dijiye ki yahi aapka matlab tha.**

Matching **roz** hoti hai, par payout **har Friday** ek saath. Poori daily aur weekly history save rehti hai — member khud apna purana record dekh sakta hai.

### 5.3 Capping — roz kitna kama sakte hain

Member ki **apni kharidari (Self PV)** decide karti hai roz kitni matching milegi.

| LEVEL | SELF PV | DAILY CAP | MAX ₹/DIN | HAR MAHINE MAINTAIN |
|-------|---------|-----------|-----------|---------------------|
| 0     | 0 – 249 | —         | Kuch nahi | —                   |
| 1     | 250     | 1,000     | ₹800      | 0                   |
| 2     | 500     | 2,000     | ₹1,600    | 50 PV               |
| 3     | 750     | 3,000     | ₹2,400    | 100 PV              |
| 4     | 1,000   | 4,000     | ₹3,200    | 150 PV              |
| 5     | 2,000   | 5,000     | ₹4,000    | 200 PV              |
| 6     | 3,000   | 7,000     | ₹5,600    | 300 PV              |
| 7     | 4,000   | 10,000    | ₹8,000    | 400 PV              |

8      5,000      12,000      ₹9,600      500 PV

#### RULE — CAPPING AUR ACTIVATION

**250 Self PV se kam** → **koi payout nahi**, chahe team me kitna bhi volume ho.

Registration free, **KYC zaroori**, minimum age **18**. ID **activate** karne ke liye **250 PV ki self-purchase mandatory**.

Level bachaye rakhne ke liye har mahine aakhri column jitni PV kharidni padegi — nahi kharidi to agle mahine level aur cap **gir jaayega**.

## 5.4 Startup, Mentor's aur Achievers

| INCENTIVE        | KIS PE                                  | KITNA                                                                                      |
|------------------|-----------------------------------------|--------------------------------------------------------------------------------------------|
| <b>Startup</b>   | Direct PV milestones                    | 3,000 PV → ₹2,100 · 10,000 PV → +₹3,000 (total ₹5,100 = 51%). <b>Ek hi baar</b> milta hai. |
| <b>Mentor's</b>  | <b>Sponsor tree</b> (binary nahi)       | 5 level, har level <b>7% of BPI</b> = max <b>35%</b> . Koi capping nahi.                   |
| <b>Achievers</b> | Org-1 + Org-2 PV + monthly direct sales | Rank + tour + company turnover ka % (neeche)                                               |

**Mentor's Incentive ke 5 level** — dhyan rakhiye, ye **sponsor tree** pe chalta hai, binary tree pe nahi:

| LEVEL        | KAUN LOG                             | AAPKO MILEGA                  |
|--------------|--------------------------------------|-------------------------------|
| <b>1</b>     | Jinko <b>aapne khud</b> sponsor kiya | <b>7%</b> unki BPI ka         |
| <b>2</b>     | Jinko <b>unhone</b> sponsor kiya     | <b>7%</b>                     |
| <b>3</b>     | Level-2 walon ke sponsee             | <b>7%</b>                     |
| <b>4</b>     | Level-3 walon ke sponsee             | <b>7%</b>                     |
| <b>5</b>     | Level-4 walon ke sponsee (aakhri)    | <b>7%</b>                     |
| <b>Total</b> |                                      | <b>35% — koi capping nahi</b> |

#### MENTOR'S — CHAIN TOOT JAATI HAI

Agar aapke sponsee ke neeche kisi ko **kisi aur ne** sponsor kiya, to wo **aapki level me nahi aata**. Sirf wahi chain gini jaati hai jo sach me **aapki sponsorship** se neeche bani ho.

| LV | RANK | ORG-1 PV | ORG-2 PV | DIRECT/MAHINA | REWARD | %<br>TURNOVER |
|----|------|----------|----------|---------------|--------|---------------|
|----|------|----------|----------|---------------|--------|---------------|

|   |                   |             |             |          |                             |     |
|---|-------------------|-------------|-------------|----------|-----------------------------|-----|
| 1 | Silver Director   | 1,00,000    | 1,00,000    | 5,000    | 3N/4D Goa                   | 15% |
| 2 | Gold Director     | 5,00,000    | 5,00,000    | 25,000   | Domestic tour               | 10% |
| 3 | Platinum Director | 25,00,000   | 25,00,000   | 50,000   | Intl. + 2% car fund         | 8%  |
| 4 | Diamond Director  | 50,00,000   | 50,00,000   | 1,00,000 | International tour          | 7%  |
| 5 | Crown Director    | 2,00,00,000 | 2,00,00,000 | 2,00,000 | Family tour + 3% house fund | 7%  |

**Paisa kaise banta hai — example.** Maan lijiye us mahine company ka **PV + GV turnover = 1,00,00,000**, aur qualifiers itne hain:

| LEVEL        | POOL (% × TURNOVER) | KITNE QUALIFIERS | HAR EK KO MILEGA |
|--------------|---------------------|------------------|------------------|
| 1 · Silver   | 15% = 15,00,000     | 50               | 30,000 PV        |
| 2 · Gold     | 10% = 10,00,000     | 25               | 40,000 PV        |
| 3 · Platinum | 8% = 8,00,000       | 15               | 53,333 PV        |
| 4 · Diamond  | 7% = 7,00,000       | 10               | 70,000 PV        |
| 5 · Crown    | 7% = 7,00,000       | 4                | 1,75,000 PV      |

Jitne **kam qualifiers**, utna **zyada per person** — isliye upar ke rank me amount badi hoti hai.

#### AAKHRI 3 LEVELS WALA RULE — EXAMPLE SE

Ek achiever jo **Level 4 (Diamond)** pe hai aur uska criteria pura hai, usko **Level 2 + 3 + 4** teeno ka pool milega:

$$40,000 + 53,333 + 70,000 = 1,63,333 \text{ PV}$$

Ye number **aapke apne plan document ke example se bilkul match karta hai** — matlab humne rule sahi samjha hai. ☒

Level 5 pe ho to 3+4+5 milega. Aur agar top level ka criteria pura na ho, to wo level nahi ginta (Level 5 pe ho par criteria adhoora → sirf 3+4).

| PAYOUT TERMS  | DETAIL                                                               |
|---------------|----------------------------------------------------------------------|
| Closing cycle | Calendar month — 1 tareekh se aakhri din                             |
| Payout kab    | Closing ke <b>10 din</b> ke andar                                    |
| Tours         | Domestic/International me <b>hotel + khana + conveyance</b> included |

**Goa tour**Hotel + khana included; **conveyance nahi** (bus/train/airport ka kharcha khud)**RULE — QUALIFY PV SE, POOL PV + GV SE**

Rank **qualify** karne ke liye sirf **PV** target (Org-1, Org-2, monthly direct sales).

Par jab **paisa baantna** hota hai, pool company ke **total PV + total GV** pe banta hai. Har rank ka % usi combined turnover pe lagta hai.

Achiever ko **aakhri 3 qualified levels** ka pool milta hai — Level 4 pe ho to **2+3+4** (= 40,000 + 53,333 + 70,000 = **1,63,333 PV**, jo aapke plan ke example se exactly match karta hai). Level 5 pe ho to 3+4+5. Top level ka criteria pura na ho to wo level nahi ginta.

## 06 Ek Sale — Shuru Se Aakhir Tak

Ab tak humne modules alag-alag dekhe. Yahan **ek hi purchase** le kar dikhate hain ki poore system me kya-kya hota hai — isse saari cheezein jud jaayengi.

| STEP | KYA HOTA HAI                                                                                | KIS MODULE KA |
|------|---------------------------------------------------------------------------------------------|---------------|
| 1    | Cashier <b>member ki unique ID</b> daalta hai. System uski पूरी detail utha leta hai.       | Module 5      |
| 2    | Products add hote hain. GST lagti hai. Bill <b>bechne wali shop ke naam</b> se banta hai.   | Module 2      |
| 3    | Us franchise ka <b>stock kam</b> hota hai. <b>Wallet ko haath nahi lagta.</b>               | Module 3      |
| 4    | Bill ke saare products ka <b>total PV</b> nikalta hai.                                      | Module 2      |
| 5    | <b>Self point</b> buyer ko — isse uska capping level upar ja sakta hai.                     | Module 5      |
| 6    | <b>Direct point</b> buyer ke sponsor ko.                                                    | Module 5      |
| 7    | <b>Team point</b> tree me upar har member ko — apni Left ya Right side me.                  | Module 4 + 5  |
| 8    | Us raat <b>BPI matching</b> chalti hai: match → capping → 80% payout → baaki carry ya wash. | Module 5      |
| 9    | <b>Mentor's Incentive</b> — sponsor tree me 5 level tak, har level ko BPI ka 7%.            | Module 5      |
| 10   | Mahine ke end me <b>Achievers</b> ki qualification aur pool distribution.                   | Module 5      |
| 11   | Upar ka <b>har step permanent record</b> me likha jaata hai — kabhi bhi check ho sakta hai. | Sab           |

### DO CHEEZEIN ALAG-ALAG CHALTI HAIN — YAAD RAKHIYE

**Steps 2–3** = trading business. Stock aur paisa **franchise network** me chalte hain.

**Steps 4–10** = incentive business. Points **member network** me upar jaate hain.

Ek hi bill dono ko chalata hai, par ye kabhi mix nahi hote. Isi liye member ki ID daalna zaroori hai — wahi dono ko jodti hai.

## 07 Aapko Kya-Kya Milega

System ek hi jagah banega, par uske **alag-alag hisse alag logon ke liye** honge. Har kisi ko sirf apna hissa dikhega.

| KISKE LIYE                           | KYA HAI                                                                                                 | GOOGLE PE DIKHEGA?                       |
|--------------------------------------|---------------------------------------------------------------------------------------------------------|------------------------------------------|
| <b>Public website + Member login</b> | Landing page, company aur plan ki jaankari, aur member ka apna login — points, team, income, statement. | <b>Haan</b> — yahi aapka public face hai |
| <b>Franchise portal</b>              | Franchise ke liye alag login — fund request, stock request, billing, invoice, stock report.             | <b>Nahi</b> — private rahega             |
| <b>Super Admin panel</b>             | Aapke liye — franchise banana, product/price set karna, approvals, payout, poore business ki reports.   | <b>Nahi</b> — sabse zyada secure         |
| <b>Mobile App (baad me)</b>          | Member ke liye app — same login, points aur team mobile pe.                                             | Play Store / App Store                   |

#### SECURITY — YE ZAROORI HAI

**Sirf public website aur member login Google pe search me aayenge.** Franchise portal aur Admin panel Google se **poori tarah chhupe** rahenge — koi unhe search karke nahi dhoond sakta.

Admin panel pe extra protection hoga — sirf approved logon/locations se hi khulega.

Har portal ka apna alag address hoga, aur **har request pe check hoga** ki user ko wo data dekhne ka haq hai ya nahi.

#### AAGE KE LIYE TAIYAR

Sab kuch **ek hi jagah (one codebase)** banega, alag-alag tukdon me nahi. Fayda:

- Naya feature ya naya portal add karna aasan — poora system dobara nahi banana padta.
- Mobile app baad me aayega to wahi login aur wahi data use karega — dobara kaam nahi.
- **Incentive plan ke rules ek hi jagah** rakhe jaayenge. Kal plan me % ya slab badla, to ek jagah badalne se sab jagah lag jaayega — code dobara likhna nahi padega.

## 08 Live Demo — Chala Ke Dekhiye

Is document ke saath **chalte hue interactive demo** bhi diye hain. Browser me double-click kariye — kuch install nahi karna, internet ki bhi zaroorat nahi.

| DEMO                        | KYA DIKHATA HAI                                            | KIS SECTION KE SAATH |
|-----------------------------|------------------------------------------------------------|----------------------|
| <b>Franchise flow</b>       | Distribution network, pincode mapping, commission ladder.  | Section 3            |
| <b>Billing &amp; wallet</b> | Wallet/stock ka behaviour, fund aur stock request, limits, | Section 3            |

|                                |                                                                                                                               |           |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-----------|
|                                | 50/50 rules.                                                                                                                  |           |
| <b>Member tree</b>             | Live binary tree — khud member add karke chain rule dekhiye.                                                                  | Section 4 |
| <b>Points &amp; incentives</b> | Ek guide poora incentive plan step-by-step samjhata hai, saath me live BPI simulator, capping slider aur achiever calculator. | Section 5 |

#### PLAN VERIFY KARNE KA SABSE ACHA TAREEKA

**Points & incentives** demo kholiye aur **Auto play** dabaiye. Wo poora plan ek-ek step karke aasan bhasha me samjhata hai.

Phir uske andar **BPI simulator** me apne numbers daaliye — matching, carry aur washout check kijiye. Koi bhi number galat lage to wahi correction Section 9 me likh dijiye.

## 09 Aapse Confirm Karna Hai

Ye open points hain. **Inke bina system finalize nahi ho sakta.** Please tick kar ke wapas bhej dijiye.

| #  | SAWAAL                                                                                                            | HUMNE YE MAANA                            | AAPKA JAWAB                                                                                                                                                       |
|----|-------------------------------------------------------------------------------------------------------------------|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | Washout tab hi lage jab us side pe <b>aaj naya business</b> aaya ho?                                              | Haan (isse aapke dono din sahi aate hain) | <input checked="" type="checkbox"/> Sahi                                                                                                                          |
| 2  | Agar member ka <b>sponsor uski upline me nahi</b> hai, to usko team point milega? Kis side?                       | Sirf Direct point milta hai               | <input checked="" type="checkbox"/> Sahi — condition hi nahi bnti (sponsor hamesha upline me hota hai, chain placement sponsor ke apne node se hi start hoti hai) |
| 3  | Report me washout ka number — aapki sheet me 394, hisaab se 441 (47 ka farq purane carry ka).                     | Hum hisaab wala dikhate hain              | <input checked="" type="checkbox"/> 441 (hisaab wala sahi)                                                                                                        |
| 4  | Bill cancel ya <b>stock return</b> hone pe — jo incentive already de diya, wo wapas lena hai?                     | Abhi define nahi                          | Billing wallet touch nahi karti (sirf stock).<br>Cancel/return pe stock aur wallet apne aap reverse ho jaate — alag clawback logic ki zaroorat nahi.              |
| 5  | <b>Minus limit</b> aur <b>stock limit</b> ki value kaun set karega?                                               | Admin, har franchise ke liye alag         | <input checked="" type="checkbox"/> Sahi — Admin, har franchise ke liye alag                                                                                      |
| 6  | <b>Fund request reject</b> hone pe paisa wapas jaata hai ya request bas band ho jaati hai?                        | Abhi define nahi                          | <input checked="" type="checkbox"/> Paisa wapas (refund)                                                                                                          |
| 7  | <b>Payout bank me</b> kaise jaayega — kitni baar, minimum kitna, TDS/charge katega?                               | Abhi define nahi                          | Pending — client baad me confirm karenge                                                                                                                          |
| 8  | <b>GV aur CV</b> exactly kaise use honge? PV ke rules clear hain, GV/CV ke nahi.                                  | Abhi define nahi                          | GV = Achiever pool turnover me use hota hai (Section 5.4)                                                                                                         |
| 9  | <b>Price ladder</b> — module spec me L1 ₹700 / L2 ₹725 / L3 ₹750, par aapke note me 670 / 700 / 750. Kaunsa sahi? | Humne module spec wala liya               | Fixed nahi — ye sirf example hai. Price Admin dynamically set/change kar sakta hai (product_level_prices table se).                                               |
| 10 | <b>Mini-Warehouse</b> ka buy price ₹685 (margin ₹15) — ye abhi bhi sahi hai?                                      | Haan, spec ke hisaab se                   | Same — Admin ke control me, dynamic (hardcoded nahi)                                                                                                              |

**YE BHI JALDI DECIDE KAR LIJIYE**

**Member withdrawal** — minimum kitna nikaal sakta hai, KYC zaroori hai ya nahi, paisa kis gateway se jaayega.

**Return / refund policy** aur uska already-di-hui incentive pe kya asar.

**Compliance:** India me direct-selling business ko apna compensation plan publish karna hota hai. Launch se pehle plan document ka **legal review** karwa lijiye.

## 10 Kaise Banega — Phases

Hum phase-wise banayenge, taaki aapko jaldi chalta hua software mile — sab kuch ek saath ka intezaar na karna pade.

| PHASE                         | KYA MILEGA                                                                                                          |
|-------------------------------|---------------------------------------------------------------------------------------------------------------------|
| <b>1 · Foundation</b>         | Admin panel, franchise setup, products, pricing, users, roles aur permissions.                                      |
| <b>2 · Trading</b>            | Fund request, stock request, billing, invoice, GST, stock aur wallet limits. <b>Ye akela bhi live ja sakta hai.</b> |
| <b>3 · Network</b>            | Member registration, KYC, binary tree, sponsor & placement, member portal.                                          |
| <b>4 · Points</b>             | Har bill pe PV/GV capture, self/direct/team distribution, member ka point statement.                                |
| <b>5 · Incentives</b>         | BPI daily matching, capping, carry/wash, weekly payout, Startup aur Mentor's incentive.                             |
| <b>6 · Ranks &amp; Payout</b> | Achievers, monthly pool distribution, payout processing, reports.                                                   |

**HAMARI SABSE BADI SALAH**

Phase 4 ke baad, Phase 5 chalu karne se pehle — points ko **3-4 hafte sirf dikhaiye, paisa mat dijiye.**

Members apne points roz badhte dekhenge aur apne hisaab se verify karenge. Aap bhi confirm kar lenge ki plan bilkul waisa hi chal raha hai jaisa socha tha — **paisa dene se pehle.**

Baad me hone wale jhagdon se bachne ka ye sabse asardaar tareeka hai.

## 11 Confirmation & Sign-off

Neeche sign karke aap confirm karte hain ki is document me likhe business rules aapke plan se match karte hain — sivaay unke jinpe aapne Section 9 me correction likhi hai.
